

Health & Safety Awareness - Construction

Course Overview

To give construction operatives an awareness of health and safety and how it affects their daily role. It will help them understand the potential hazards that they face at work on site.

Course Objectives

This course can be used as preparation training for the CSCS Health and Safety Test or as refresher training for operatives. The course will cover individual responsibilities for the safety of themselves and others, typical construction hazards and how they are controlled, and how everyone can help achieve better practical standards of safety on site.

Course Content

- Health & Safety at Work Act 1974
- Legal requirements and liabilities
- Enforcing Authorities
- Working at height
- COSHH
- Manual handling
- Fire prevention
- Work equipment
